

# 10kW solar battery price australia

What is a 10kW solar battery?

A 10kW solar battery is an energy storage system capable of holding approximately 10 kilowatt-hours of electricity generated by your solar panels. Think of it as a large rechargeable unit that captures excess solar energy during sunny days and releases it when you need it most--during evening peak hours or when the sun isn't shining.

How much does a 10kW solar battery cost in Australia?

The average 10kW solar battery price in Australia ranges from \$10,000 to \$18,000 fully installed in 2025, depending on the brand, inverter type, installation complexity, and available government rebates. This cost typically includes the battery unit, hybrid inverter, battery management system and professional installation.

How much does a 10kW Solar System cost?

If you're starting from scratch or upgrading an existing system, understanding the 10kW solar system with battery price helps you budget accurately. A complete 10kW solar system paired with battery storage typically ranges from \$14,000 to \$25,000, representing a comprehensive energy solution. This complete package generally includes:

How much does a 10kW battery cost in Sydney?

Solar National currently advertises 10kW batteries starting at just \$3,700, significantly undercutting the national average. This is possible due to bulk pricing deals and streamlined installation offerings. The low entry point makes 10kWh batteries financially accessible to a broader range of homes in Sydney and surrounding regions.
