

200kW charging station cabinet in Malaysia

What does the 200 kW DC EV charging station mean for Malaysia?

The launch of the 200 kW DC EV charging station by Tenaga Nasional Berhad (TNB) and BHPetrol signifies a significant leap forward in Malaysia's electric vehicle (EV) infrastructure. But what does it really mean for the local landscape, and how does it compare on the global stage?

Why is Malaysia launching a 200KW DC charger?

The 200kW DC charger introduced by TNB and BHPetrol is not just a milestone for Malaysia, but it's a testament to the country's commitment to speed and efficiency. For instance, an EV battery that might take several hours to charge with a traditional AC charger can be topped up to 80% in less than an hour with this high-power alternative.
