

2025 pack lithium battery

How much do EV batteries cost in 2025?

Stationary storage costs plunged 45%,EV packs averaged \$99/kWh,with China leading lowest prices. New York - December 9,2025 - According to BloombergNEF's 2025 Lithium-Ion Battery Price Survey,average pack prices have fallen to a record low of \$108 per kilowatt-hour,marking an 8% decline from 2024 despite higher costs for key battery metals.

Are lithium-ion battery pack prices dropping 8% since 2024?

Lithium-ion battery pack prices have dropped 8%since 2024 to a record low of \$108 per kWh,according to the latest battery price survey by BloombergNEF (BNEF).

Why did lithium-ion prices drop 8% in 2025?

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh,driven by LFP adoption,overcapacity,and competition. Stationary storage costs plunged 45%,EV packs averaged \$99/kWh,with China leading lowest prices.

How much does a battery cost in 2025?

While the headline figure of \$108/kWh is impressive,the real story for 2025 might lie in the stationary storage sector. Battery pack prices for stationary storage have plummeted to \$70/kWh,a staggering 45% drop from 2024.

"Battery pack price" refers to the volume-weighted average pack price of lithium-ion batteries across the electric vehicles and battery storage sectors. 2025 refers to data up to end of ...

New York, December 9, 2025 - lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF ...

The global lithium-ion (Li-ion) battery industry finds itself at a new inflection point. Demand for Li-ion batteries crossed the milestone threshold of 1.0 terawatt-hours (TWh) in 2024 and likely ...

Battery Pack Prices Drop 8% to Record \$108/kWh Despite Rising Lithium & Cobalt Costs in 2025
BloombergNEF reports that pack costs fell even as raw material expenses climbed, signaling ...

BloombergNEF finds 2025 lithium-ion battery pack prices dropped to \$108/kWh amid LFP shifts and overcapacity; China saw the steepest declines.

Volume-weighted average Li-ion battery prices, 2013-2025 Survey value for 2025 includes 320 data points from passenger cars, buses, commercial vehicles, two- and three-wheelers ...

Consistent Price Decline: Lithium-ion battery pack prices have fallen dramatically over the past 15 years, with a projected average price of \$113/kWh in 2025, down from \$668/kWh in 2013 1.

2025 pack lithium battery

Revising 2025 global battery costs to \$90/kWh using production-weighted China data, correcting procurement-biased benchmarks and shifting the energy tipping point earlier.

As the most-read industry report, Volta Foundation's Battery Report summarizes the most significant developments in the battery industry. Crowd-sourced from top industry and academia ...

Battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% drop from 2024, making it the cheapest lithium-ion category for the first time, according to BloombergNEF (BNEF).
