

3 2v cylindrical lithium iron phosphate battery

What is a cylindrical lithium ion battery?

Lithium Iron Phosphate Cylindrical Cells Cylindrical cells one of the most widely used lithium ion battery shapes due to ease to use and good mechanical stability. The tubular cylindrical shape can withstand high internal pressures without collapsing. Melasta produces multiple sizes and capacities according to the customer requirement.

What is a lithium iron phosphate cathode?

The lithium iron phosphate cathode material enables the seamless use of large-capacity lithium batteries in series. The LiFePO₄ battery operates within a voltage range of 2.8V to 3.65V, with a nominal voltage of 3.2V, and functions effectively across a wide temperature range (-20° to +75°).

How many cycles can a lithium phosphate LiFePO₄ battery run?

A Lithium Phosphate LiFePO₄ Battery charged at 1C can typically achieve around 2000 cycles. It offers notable safety features, such as resistance to puncture-induced explosions and a reduced risk of burning when overcharged. The lithium iron phosphate cathode material enables the seamless use of large-capacity lithium batteries in series.

How long does a lithium phosphate battery last?

By using lithium iron phosphate as the positive electrode material, these batteries provide outstanding safety and cycle life performance, which are essential technical indicators for power batteries. A Lithium Phosphate LiFePO₄ Battery charged at 1C can typically achieve around 2000 cycles.

The 40135 LiFePO₄ cylindrical battery cell offers 3.2V 24Ah capacity, ≥ 170 Wh/Kg energy density, and a long cycle life of 3000 cycles.

LiFePO₄ is the formula name of Lithium Iron Phosphate, also known as LFP. The nominal voltages of this battery chemistry are 3.2V. It replaced other battery technologies because of its ...

We provide a wide range of 3.2V LiFePO₄ cells, including popular prismatic cells from top brands like EVE, CATL, and CALB, ect.. With capacities ranging from 40Ah to 1000Ah, our cells are ...

The 100ah cylindrical battery cell uses an innovative lithium battery production process, low pollution and high quality. Independent development of low-pressure safety system, higher ...

Long cycle life, low internal resistance, general purpose multi-purpose, energy saving and environmental protection. 2.Factory quality, durable and safe. Suitable for all kinds of small electric ...

Rechargeable cylindrical cell 3.2v 15ah Batteries IFR32140-15Ah 32140 33140 lithium iron phosphate battery. ? Long-run Cost: LiFePO₄ battery could work at 60¢/kWh, with long life 5-10 years. ? ...

3 2v cylindrical lithium iron phosphate battery

EEMB Lithium Iron Phosphate Battery Series Li-FePO₄ Cylindrical Standard Type Battery Rechargeable - 3.2 Volt Model: 14500/18650/26650

Get the bestselling lithium iron phosphate 3.2v cylindrical battery on Alibaba at unrivaled discounts and enjoy high-performance output. The lithium iron phosphate 3.2v cylindrical battery are durable to ...

The LithiumWerks AER32140m2A1 is a high-performance lithium iron phosphate (LiFePO₄) cylindrical cell designed for demanding industrial and mobility applications. With a 3.2V nominal voltage and ...

Utilizes lithium iron phosphate (LiFePO₄) chemistry for enhanced safety, minimizing the risk of explosion or combustion from impacts, overcharging, or short circuits.
