

Australian residential solar system factory

Are solar panels made in Australia?

They certainly are. All of our solar panel systems are South Australian made, we have complete control over the manufacturing process. Before leaving our Mawson Lakes factory, every solar panel passes over 25 quality control checkpoints, so you can rest assured you're getting quality products.

Who is Australia's largest solar panel manufacturer?

We are Australia's largest solar panel manufacturer. Our focus is providing our customers with the top quality engineering solutions. We manufacture 300w-550w premium solar panels with industry leading reliability and performance warranty. Our high efficiency solar module comes with 25 year product and 25 year performance warranty.

Are ASM solar panels made in Australia?

Consumer Feedback: While specific reviews are limited, the company is recognized for its pioneering role in Australia's domestic panel assembly and reliable workmanship. ASM provides a made-in-Australia assembly service that supports local industry, though they don't manufacture photovoltaic cells themselves.

Why do we manufacture Australian-made solar panels?

Since we manufacture Australian-made solar panels, we may be a little biased. However, we manufacture in Australia for several reasons. Firstly, we're a proud Australian company that wants to contribute to the Aussie economy in a positive way. But also, we maintain total control over our manufacturing processes.
