

# Battery backup for uninterruptible power

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) keeps your essential devices temporarily online, which provides a window for you to hit send on that last-minute email. While a standard power strip or surge protector offers sufficient, albeit basic, protection, a UPS ensures devices are properly shut down and are protected from data loss.

Can a UPS battery backup cause a power outage?

In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply (UPS) also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics.

What is a good UPS with a built-in backup battery?

A UPS with built-in backup batteries is essential for protecting your devices from power outages, surges, and other electrical disturbances. Whether you opt for the high-capacity APC Back-UPS Pro 1500VA or the compact and budget-friendly Vertiv Liebert PST5, each UPS on this list offers reliable protection and peace of mind.
