

Battery cabinet circuit breaker installation

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet as viewed from the front of the cabinet. See Figure 2 for line-up-and-match configuration view. Figure 2. Eaton 93PM 50 kW or 100 kW UPS and Two 93PM Integrated Battery Cabinets

How do you wire a battery cabinet?

Route the battery cabinet ground wiring from the UPS through the top of the IBC to the wiring channel on the left side of the IBC (see Figure 13). Route the wiring along the wiring channel to the IBC ground terminal block. See Figure 14 for terminal location. Secure the ground wiring to the wire tie anchors (see Figure 15) using Zip ties.

How do I connect a battery cabinet to a ups?

1.7 For More Information, for UPS cabinet terminal locations. Route the battery cabinet ground wiring from the UPS through the top of the IBC to the wiring channel on the left side of the IBC (see Figure 13). Route the wiring along the wiring channel to the IBC ground terminal block.

What is an integrated battery cabinet-s?

The IBC-S is housed in a single free-standing cabinet with safety shields behind the doors for hazardous voltage protection. Up to four IBC-Ss per UPS may be used to meet application runtime needs. The cabinets match the UPS cabinet in style and color. Figure 1 shows the Integrated Battery Cabinet-Small.

Please read all instructions before operating the equipment and save this manual for future reference. This is a product for commercial and industrial application in the second environment. ...

Install the main POS and NEG cables from the output circuit breaker to the correct battery posts on the designated battery units shown in the provided battery system schematic.

The option provides functional access to the equipment circuit breaker via a handle located on the exterior of a cabinet door that is physically connected to the circuit breaker in the cabinet's interior.

Once the battery cabinet is configured with UVR access, wait until the UPS outputs its rated UVR voltage, prior to turning on the circuit breaker. o UVR/Shunt Pin 1 = POSITIVE (+) Polarity

This manual provides detailed information on installation, operation, and maintenance of the BC29 Battery Cabinet, including safety precautions, system specifications, and battery replacement ...

2) Use a multimeter to test the voltage between input positive and negative poles of the 9 input circuit breakers inside the DC cabinet, if battery voltage is detected to be 500V or above, then ...
