

# Chad Household Energy Storage Subsidy

How poor is Chad in 2023?

In 2023, extreme poverty across the country was recorded at 35.4%. Energy is scarce and unreliable across Chad. Only 4% of the population has access to electricity. Currently, traditional wood fuel is the primary source of energy consumption across the country.

Why do people in Chad use biomass?

People across Chad have to use conventional energy resources, such as biomass and charcoal in order to cook, light their house and other economic activities. In particular, it is women and children who spend a lot of time sourcing the biomass materials, which increases their risks of harmful respiratory diseases.

Is Chad a poor country?

Located in North Central Africa, Chad is an exceptionally diverse country, home to more than 200 ethnic groups and 100 different languages. However, with a cumulation of political instability and natural disasters, Chadians are suffering from rising food insecurity and poverty levels.

Will Djermaya solar power 60,000 households?

Once online, the Djermaya solar project could power 60,000 households and reduce the overall cost of electricity generation. USAID'S Power Africa has guided tariff approaches, indicating that the Djermaya plant will produce electricity at a cost that is 40% less than existing sources.
