

The Zagreb lithium battery energy storage project demonstrates how smart energy solutions can power sustainable industrial growth. As battery costs continue to decline and efficiency improves, now is the ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Žibenik, marking a significant step in modernising the country's energy...

As a well-connected part of Southeast Europe's power system, with extensive interconnectors, Croatia now faces the central challenge of integrating battery storage into the grid ...

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Žibenik. This initiative is spearheaded ...

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development (EBRD), the bank ...

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock ...

The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia. The office of the Mayor of Leskovac revealed plans for a 125 MWh ...

Completion of the study is expected by the end of 2025, after which it will be publicly presented and made available to support further strategic planning and the development of a sustainable and ...

The investment marks the bank's first equity stake in a standalone merchant battery energy storage system (BESS). The project will deliver up to 60 MW of flexible capacity and deploy a ...

The development will facilitate the installation of up to 60 megawatts of grid-connected battery storage capacity and the implementation of a VPP platform, enabling real-time balancing of ...
