

The Dutch spatial atomic layer deposition equipment manufacturer has launched a new sheet-to-sheet tool for pilot production of large area perovskite solar devices on glass substrates.

Saint-Gobain has successfully used 75 tons of recycled solar module glass from Dutch company Maltha Glass Recycling for the production of flat glass in a pilot project.

Ardagh Glass Packaging-Europe (AGP-Europe), an operating business of Ardagh Group, announced today that a major solar power plant at its facility in Moerdijk, the Netherlands, is now ...

At Verdazol we offer a varied range of solar energy systems, including our advanced glass-glass solar panels. Each panel in our range meets strict quality standards, as required in the ...

The module integrates perfectly into the facade and the solar technology becomes invisible. Moreover, solar modules with translucent cell spacing, can be used in skylights or in vertical facade or open ...

This project, which contributes to Ardagh Group's strategy to use 100% renewable electricity by 2030, follows the launch of the company's first solar power plant in the Netherlands, ...

As Rotterdam accelerates its green transition, smart photovoltaic module glass has emerged as a game-changer for urban solar integration. This article explores how this technology aligns with the ...

When choosing solar control glazing, it is important to consider the most effective value and the right location. For example, for free solar heat during cold periods, north- and east-facing facades often ...

Use this easy Rooftop Scan to quickly find out if your roof is suitable for solar panels and how much you could possibly save on your electricity bill. Design a detailed PV system for any location within the ...

Dutch solar glass
