Port Moresby Electrical was established in Papua New Guinea in 1968 and specialise in electrical installations and engineering services for all industries.

What is the Port Moresby power grid development project?

It is aimed at reducing fossil fuel consumption, while increasing the access to energy and improving network reliability in the grid. The Port Moresby Power Grid Development Project is funded by ADB loan 2998/2999-PNG1.

Why does Papua New Guinea have poor electrical service?

The quality of Electrical Service in Papua New Guinea is often poor due to lack of investment in the infrastructure and inadequate maintenance. This can lead to frequent power outages and unreliable power supply, resulting in disruptions to businesses, health services, and other essential services.

How can Papua New Guinea improve the quality and reliability of electricity?

In order to improve the quality and reliability of Electrical Service in Papua New Guinea, the government has taken a number of steps. These include investment in infrastructure, such as the expansion of the main grid and the development of renewable energy sources, as well as providing subsidies for households to access electricity.
