

Energy Storage New Energy Forecast

We look at storage from a much broader, sustainability and energy transition perspective and questions whether Li-ion batteries will be the primary solution to energy storage at scale going forward.

While power demand is expected to continue to see strong growth in 2025 and beyond, the growth rate of low-carbon energy sources is now close to covering the entire demand increase. ...

BNEF forecasts that global energy storage additions will reach 92 GW or 247 GWh in 2025, excluding pumped hydro. This marks a 23 percent increase in gigawatts over 2024, reflecting ...

The US Energy Storage Monitor is offered quarterly in two versions - the executive summary and the full report. The executive summary is complimentary to member companies and ...

Recent developments from India's emerging energy storage sector highlight a broadening of interest in diverse technologies and applications.

The scene is set for significant energy storage installation growth and technological advancements in 2025. Outlook and analysis of emerging markets, cost and supply chain risk, ...

The full Energy Storage Market Outlook includes the analysis from our Executive Summary plus insight and analysis into market segments, state and federal policy updates, battery chemistry ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...

In 2025, the global energy storage market is projected to maintain its growth trajectory, with new installed capacity reaching 221.9 GWh, up 26.5% YoY, as InfoLink forecasts.

NEW REPORT: US adds 58GWh of new energy storage capacity in 2025, largest single year of new battery capacity on record Inaugural Report Demonstrates Critical Role Energy Storage ...
