

What is a lightning protection system?

A lightning protection system not only protects the solar PV system but also provides reliable protection to your entire property and assets while safely diverting transient currents to the ground.

What are surge protective devices (SPDs) in battery energy storage systems?

Surge protective devices (SPDs) is required in Battery Energy Storage Systems (BESS) BESS systems contain AC/DC converters and battery banks implemented in concrete constructions or in metallic containers.

Do I need an external lightning protection system?

Therefore the need for optimized and reliable electrical protection against the influence of lightning and surge events becomes mandatory. A risk assessment per IEC 62305-2 should first be performed to understand better if an external lightning protection system (LPS) is required.

Which external lightning protection measures are required?

A risk analysis according to IEC 62305-2 is carried out to determine which external lightning protection measures are required, for example, which class of LPS needs to be considered in the planning and implemented in the lightning protection concept.

Our products technology and related engineering service involve in the field of Lightning strike protection, surge protection and grounding. We provide professional lightning protection ...

Protection against surges and overvoltages in Battery Energy Storage Systems The purpose of this paper is to illustrate when and where the installation of surge protective devices ...

DEHN Protects Grid-scale Energy storage systems To prevent a direct strike from melting holes in the metal roof, a lightning mast is installed at the proximity of the defined strike ...

A Battery Energy Storage System (BESS) contains AC/DC converters and a bank of batteries which are stored either in concrete structures or metallic containers. If an electrical arc (due ...

We develop and implement customised protection concepts against lightning and surge damage - both for utility-scale projects and for battery storage systems. Our solutions are aimed at manufacturers of ...

Lightning and Surge Protection Device SPD for Battery Energy Storage Systems (ESS), Surge Protection of ESS Equipment

solar surge protection device Jinli Electric's integrated lightning protection solution for power generation, grid, load and storage--building a new defense line for energy security Aug 07, 2025

Battery energy storage systems are an important technology used to store electricity generated from renewable

energy sources and feed it back into the grid on demand. However, the ...

This paper deals with an optimal operation method for surge protective devices (SPDs) to calculate the maximum continuous operating voltage (UC) and the voltage protection level (UP) by ...

In order to ascertain the required quantity of lightning protection equipment for energy storage systems, several factors must be meticulously evaluated. 1. The size and capacity of the ...
