

# European energy storage subsidies

How will the European Commission support large-scale energy storage in Spain?

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for standalone energy storage sites, projects installed alongside renewable energy facilities, and storage planned as part of thermal power plants.

How does the EU support green energy?

The emphasis on renewables, clean mobility, and energy storage solutions reflects the EU's commitment to achieving climate neutrality by 2050 under the European Green Deal. Government support for green energy across Europe takes various well-structured forms, including:

Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

Who is funding the energy storage Awards?

The Winners Are Set to Be Announced for the Energy Storage Awards! The grants will be funded by the EU's Emissions Trading System. Image: CC. The EU has today (23 November) launched a grant funding opportunity worth EUR4 billion (US\$4.4 billion) for upstream and downstream clean energy projects, including energy storage.
