

High-efficiency photovoltaic containerized systems for US water treatment plants

We build Truly containerized RO systems providing compact design and friendly maintenance access and operation. RO, CIP flushing and MMF are provided in a single container, no ...

Whether you need solutions for a small town or a large industrial plant, Fluence's NIROBOX(TM) has flexible, containerized options for desalination, water, and ...

Two New Jersey utilities have joined forces on a clean energy ...

In this review, we briefly assess the characteristics of above PV on water system concepts and their potential for applications through case studies. ...

According to customer's requirement, we supply and assembly of a 20 foot new containerized water treatment unit (desalter) with a minimum ...

Hundreds of these systems are currently in operation, treating water with TDS of up to 10,000 PPM and producing flow rates of up to 70 gallons per minute. ...

Because the WSPV system is deployed on the water surface, it not only reduces the amount of sunlight reaching the water surface but also inhibits the interaction between wind and ...

Our turn-key water treatment systems are all pre-engineered using the latest CAD technology available. This enables our teams to build and deliver treatment ...

With the use of our PV Solar Tracking system, the AquaPur(TM) RO Water Plant can run 100% on solar energy - saving thousands of dollars on operating costs per ...

Our portable solar-powered RO systems have a long and impressive reputation when it comes to practical and cost-efficient water treatment. They are eco-friendly and have reduced operational ...
