

# How many hydrogen energy stations are there in Spain

How many hydrogen stations are there in Spain?

In Spain, the Hydrogen Roadmap approved by the Spanish Government contemplates the implementation of a network with a minimum of 100 hydrogen stations by 2030. Currently there are only six, located in Madrid, Seville, Zaragoza, Huesca, Albacete and Puertollano although, for the time being, they are not for public use.

When was the first hydrogen filling station opened in Spain?

[CLICK HERE!](#) The first hydrogen filling station in Spain open to the public was inaugurated in 2019 in Albacete. This milestone marked the beginning of a sustained effort by the government and private companies to promote the use of clean energy and reduce dependence on fossil fuels.

How many hydrogen refueling stations will Spain have by 2030?

The census also identifies plans for more than 90 hydrogen refueling stations by 2030, which would allow Spain to comply with the EU's Alternative Fuels Infrastructure Regulation (AFIR) requiring at least 78 public stations along the TEN-T core network.

Can hydrogen be used as a renewable fuel in Spain?

The development of hydrogen as a renewable fuel is considered a priority to decarbonize the industrial and mobility sectors of Spain (National Hydrogen Roadmap, October 2020). Spain has an abundance of sunshine and windy hillsides, making it a well-suited location for green hydrogen plants.

The EU approved EUR600m for clean transport, including 38 hydrogen stations. Spain gets most of them as rest of Europe retreats from hydrogen mobility.
