

Huailin installs solar power generation

How much solar power did China install in H1 2025?

In H1 2025, the world added 380 gigawatts (GW) of new solar capacity - a staggering 64% jump compared to the same period in 2024, when 232 GW came online. China was responsible for installing a massive 256 GW of that solar capacity. For context, it took until September last year to pass the 350 GW mark.

How many solar panels did China install in 2025?

(Photo Credit: TaiyangNews) China installed 104.93 GW of solar from January to April 2025, surpassing the 100 GW milestone 2 months earlier than in 2024, when the mark was reached in the first half, according to the latest data released by the country's National Energy Administration (NEA).

How big is China's solar power pipeline?

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the global effort in renewable energy buildout. This is in addition to China's already operating 1.4 TW of solar and wind capacity, nearly 26% of which (357 gigawatts (GW)) came online in 2024.

Did China surpass 100 GW of solar PV capacity in H1 2024?

Last year, China exceeded 100 GW of new solar PV capacity in H1 2024, with an increase of 24.06 GW over 78.42 GW the country reported for H1 2023 (see [China Exceeds 100 GW Solar Installations Mark In H1 2024](#)).

4MW Rooftop Distributed Power Station in Fengxian District, Shanghai - Global Project References - PV Solar products Manufacturer, Solar Panel Suppliers India - JaSolar

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the global effort in renewable energy buildout. This is in addition to China's already ...

China installed 104.93 GW of solar from January to April 2025, surpassing the 100 GW milestone 2 months earlier than in 2024, when the mark was reached in the first half, according to the ...

lity of solar power plants in India. With over 20 years of clean energy expertise, Fenice Energy remains at the forefront of providing robust and efficient solar power plant components. Understanding the

Hunan Lengshuitan Huangyangsi Hualin Forestry solar farm is a solar photovoltaic (PV) farm under construction in Huangyangsi Town, Lengshuitan District, Yongzhou, Hunan, China.

The project, being the first and largest of its kind in the world, was developed by CHN Energy's Guohua Energy Investment Co., Ltd. and will serve as a model for the development of large ...

China has completed the world's largest offshore floating solar installation, marking a major milestone in renewable energy development. The massive project shows how the country is turning ...

Huailin installs solar power generation

Solar surged 64% in H1 2025 with 380 GW added worldwide, led by China's record pace, keeping 2025 on track for new highs.

Utility-scale solar power capacity in China reached more than 880 gigawatts (GW) in 2024, according to China's National Energy Administration. China has more utility-scale solar than ...

China is set to break new ground in its energy transition, with 2025 renewable capacity additions projected to exceed 500 GW, driven by surging solar and wind deployment, according to a ...
