

Mercedes-Benz is developing a new and pioneering solid-state battery to use in its upcoming electric vehicles. The German carmaker has teamed up with the ...

Hydro-Quebec developed a first-generation solid-state battery in the 1990s and has continued research and development work on improving both efficiency and ...

Canada 's Hydro-Quebec is cooperating with Mercedes-Benz in the development of technologies for solid-state batteries. The aim is to test new materials under field conditions and thus ...

Based on Hydro-Quebec's knowledge with polymers, a solution of all-solid composite battery with ceramic tendency has been developed by generating several industrial properties at the different ...

Since a few years, Hydro Quebec has made research on solid state batteries and particularly on batteries with sulfide ceramic electrolytes. An innovative solution was developed to manage the ...

The Fraunhofer Institute for Silicate Research ISC and Hydro-Quebec are teaming up to conduct research and development into next-generation lithium-ion and lithium-air battery materials to be ...

Canadian public utility Hydro-Quebec has formed a partnership with German carmaker Mercedes-Benz AG to speed up the research and ...

The utility recently announced that it's working with Daimler Benz ...

NEW GENERATION SOLID-STATE BATTERIES OF HYDRO-QUEBEC USING SULFIDE SOLID ELECTROLYTE AND LITHIUM METAL ANODE commercialized for electric vehicle applications. The ...

Hydro quebec solid state battery
