

Irish Grid Energy Storage Company

We represent Ireland and Northern Ireland's energy storage industry bringing together exciting new technologies and innovations that will help decarbonise our energy system and support a strong, ...

Statkraft announces it will build Ireland's first four-hour grid-scale battery energy storage system (BESS) in Co. Offaly, co-located with Cushaling Wind Farm. Battery storage technology can ...

National grid operator EirGrid, its subsidiary, System Operator Northern Ireland (SONI), and the Single Electricity Market Operator intend to allow battery storage businesses to trade ...

Large-scale battery energy storage projects and Turlough Hill pumped hydro energy storage (PHES) between them help provide flexibility and support more renewables in Ireland's ...

Over 2.5GW of grid-scale battery storage is in development in Ireland, with six projects currently operational in the country, four of which were added in 2021.

EirGrid is Ireland's TSO, which stands for "Transmission System Operator". We plan, manage and develop Ireland's high-voltage electricity grid for a sustainable future.

Siemens Energy will deliver the first-ever hybrid grid stabilization and large-scale battery storage plant at Shannonbridge in Ireland. This is the first time, these two technologies have been ...

The facility is capable of providing a rapid delivery of electricity into the power grid in order to balance fluctuations resulting from the growing proportion of electricity generated by intermittent renewables.

We are at the forefront of developing battery systems, supporting the decarbonisation of Ireland's electricity system. We currently have more than 300MWs of battery storage capacity in operation in ...

Statkraft, the largest producer of renewable energy in Europe, has launched Ireland's first ever four-hour grid-scale Battery Energy Storage System beside its windfarm at Cushaling in Co Offaly.
