

Is the flash light strip solar powered

What is a solar powered flashlight?

A solar-powered flashlight with a magnet can be mounted to a car or other metal surface for use as either a set light source or a work light. Solar-powered flashlights often incorporate additional survival and emergency tools.

Can a solar powered flashlight be used without a battery?

Those without access to batteries or power to charge a flashlight can turn to a solar-powered flashlight to help them through such situations. These charged-by-the-sun flashlights are often sought by campers and hikers for their portability and reliability.

How much does a solar powered flashlight cost?

If you will be primarily using your solar-powered flashlight for camping, try to choose one in the 100 to 150 lumens range. Solar-powered flashlights range in price from under \$10 to around \$30. The average is \$15 to \$20. Inexpensive/mid-range: At a lower price point, you find simple flashlights with few bells and whistles.
