

Latest Tunisian PV Energy Storage Policy

Does Tunisia need solar power?

Expanding Solar Power to Meet Growing Energy Needs To bolster its solar energy capacity, the Tunisian government signed agreements with renewable energy firms Scatec and Aelous to build solar plants in Sidi Bouzid and Tozeur.

How will Tunisia bolster its solar energy capacity?

To bolster its solar energy capacity, the Tunisian government signed agreements with renewable energy firms Scatec and Aelous to build solar plants in Sidi Bouzid and Tozeur. Each 50 MW plant represents a combined investment of EUR79 million, with construction underway and operations planned to commence in 2025.

Is Tunisia ready for a large-scale solar project?

It previously completed a 500 MW solar tender in December 2019. In October 2024, Tunisia launched a new tender for 200 MW of large-scale solar, with submissions due by Jan. 15, 2025. Tunisia's total solar capacity reached 506 MW by the end of 2023, according to the International Renewable Energy Agency (IRENA).

Why is Tunisia investing in a secure electricity network?

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe.

Accelerating the Energy Transition : Reforms and Ambitions To address these challenges, Tunisia has set ambitious targets : Reducing carbon intensity by 45% by 2030 and increasing ...

Tunisia Solar PV Market Report This report will explore the current landscape of Tunisian solar energy market, including qualitative and quantitative insights, market trends, relevant regulations and ...

New \$430 million World Bank-supported program to support Tunisia's efforts to expand renewable energy, improve electricity reliability, and strengthen sector governance.

Tunisia is advancing its renewable energy agenda with strategic initiatives aimed at achieving 30% renewables in its energy mix by 2030. Guided by Law No. 2015-12, the country has ...

The Tunisian Solar Plan has been central in translating generation targets of 12% by 2022 and 30% by 2030 into actual capacity installations. From 360 MW installed by 2019, the plan identifies an ...

Tunisia - Tunisia, which plans to integrate 35% renewable energy into the national electricity mix by 2030 and to embed the principles of energy efficiency, would benefit from preparing ...

solar PV and wind together accounting for nearly 70%. The integration of these variable energy sources into national energy grids will largely depend on storage technologies, and among ...

Latest Tunisian PV Energy Storage Policy

Meta Description: Explore how Tunisia's new energy storage subsidy policy reshapes renewable energy investments. Learn about eligibility criteria, financial benefits, and how EK SOLAR delivers tailored ...

Expanding Solar Power to Meet Growing Energy Needs To bolster its solar energy capacity, the Tunisian government signed agreements with renewable energy firms Scatec and ...

The Tunisian government has granted licenses to four PV projects with a combined capacity of 500 MW. The selected developers are Qair International, Voltalia, Toyota Tsusho and ...
