

Lisbon energy storage

Why is storage important in Portugal?

Storage provides real-time flexibility, enabling participation in balancing markets and maintaining grid stability and inertia, especially in Portugal where these markets are growing. Despite the increase in interconnection capacity between Spain and Portugal, it could experience congestions during non-solar hours.

How has Lisbon's storage policy changed over the past 18 months?

Policy has moved just as fast. In the past 18 months Lisbon introduced a streamlined licensing code, approved EUR100 M in Plano de Recuperaç#231;#227;o e Resili#234;ncia grants for 43 storage projects, and is drafting a 750 MVA capacity auction to go live before January 2026.

Can storage replace thermal generation in Portugal?

The pursuit of economic viability by storage facility owners will inherently lead to charging during low-cost hours and discharging during hours that are more economically attractive. Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target.

How many hybrid storage projects are being deployed in Portugal?

Additional hybrid capacity is being deployed, namely by Iberdrola, Greenvolt, Akuo, EDP and GALP, supported by Portugal's Recovery and Resilience Plan (PRR) programme under the "Flexibility and Storage" incentive call. Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants.

Portugal's energy transition, driven by ambitious decarbonization goals and its European leadership in renewable energy production, faces a critical challenge: the intermittency of renewable ...

Lisbon's iconic yellow trams zipping through streets powered entirely by stored solar energy. While we're not quite there yet, the Lisbon Energy Storage Project Bidding process for 2025 ...

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader EUR400 million package aimed at improving grid reliability and ...

Lisbon-based Endesa subsidiary Newcon40 Unipessoal Lda is developing the Sol de #201;vora Photovoltaic Solar Plant which would include a 240.72 MW/481.44 MWh battery energy ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

PORTUGUESE STORAGE AS OF TODAY Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems ...

Lisbon power storage Does Portugal need energy storage? From ESS News Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records ...

Lisbon energy storage

The Portuguese Ministry of Energy has allocated EUR99.75 million for grid flexibility and energy storage projects which should be installed by the end of 2025. 41 applications approved for ...

Storage can increase self-consumption during non-solar hours, aligned with Portugal's 2030 goals (5,7GW). The seasonality of consumption in certain locations in Portugal, such as ...

Lisbon - 17 December 2025 - Hyperion Renewables, a company with nearly two decades of experience in developing, financing and operating utility-scale renewables projects, has started construction of ...
