

Maplebridge Solar Power Generation

The solar farm, located on the site of a former coal mine, consists of over 235,000 panels and was constructed by Gemma Power Systems as part of CPV's growing portfolio of utility scale ...

Rising from Pennsylvania's Allegheny Mountains, the CPV Maple Hill Solar Farm represents a significant diversification of the state's energy portfolio, demonstrating how solar development can create new ...

View the monthly generation and consumption, generator details, and more for CPV Maple Hill Solar.

After bringing on 6.8 GW of natural gas, wind, and solar generation since 2010 and with a current pipeline of over 10 GW of renewable and dispatchable generation projects, including utility-scale ...

The solar farm, located on the site of a former coal mine, consists of over 235,000 panels and was constructed by Gemma Power Systems as part of CPV's growing portfolio of utility-scale ...

Maple Hill Solar PV Park is a ground-mounted solar project which is spread over an area of 480 acres. The project generates 185,000MWh electricity and supplies enough clean energy to ...

Maple Ridge Wind Farm is a joint venture between EDP Renewables North America and Avangrid Renewables. The wind farm area includes the towns of Lowville, Martinsburg, Harrisburg, and ...

The project interconnects 100MW of solar generation to an existing 230kV transmission line on the bulk electric system. The added solar generation will deliver up to 180,000MWh of power to PA ...

In our first Competitive Power Spotlight, CPV's new solar project transforms a coal mine to generate 100 MW of renewable power and offset more than 100,000 tons of CO2 per year.

The solar farm, located on the site of a former coal mine, is expected to begin generating electricity by May of 2022. Maple Hill Solar will consist of 530+ watt solar panels which are provided ...
