

NDRC photovoltaic energy storage requirements

What is the NDRC 'Special Action Plan'?

The "Special Action Plan for Large-Scale Construction of New Energy Storage(2025-2027)" released by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) outlines a roadmap to scale up energy storage to support the country's rapidly expanding renewable energy capacity.

What does NDRC stand for?

On February 9,China's National Development and Reform Commission(NDRC) and National Energy Agency (NEA) jointly published the Notice on Deepening Market-Based Reform of Renewable Energy On-Grid Tariffs to Promote High-Quality Renewable Energy Development.

What is the compensation standard for new-type energy storage in 2025?

For 2025,the compensation standard for standalone new-type energy storage is set at RMB 0.35/kWh. Projects that fail to begin construction by June 30,2025,will not be eligible for the 2025 compensation.

Will China install 100 GW of new energy storage by 2027?

From ESS News China aims to install more than 100 GWof new energy storage - primarily battery storage,excluding pumped hydro - by 2027,according to a new action plan presented by authorities on Friday.

In February 2025, China's National Development and Reform Commission (NDRC) and National Energy Administration (NEA) abolished mandatory energy storage requirements for new ...

In a major policy shift towards electricity market liberalization, China has introduced contract for difference (CfD) auctions for renewable energy plants and removed the energy storage ...

China aims to install more than 100 GW of new energy storage - primarily battery storage, excluding pumped hydro - by 2027, according to a new action plan presented by authorities ...

This institutional design upgrades energy storage from a traditional "peak shaving and valley filling" tool to a "dynamic balancer" of the power system, but it also raises the requirements for ...

That's where China's National Development and Reform Commission (NDRC) steps in with game-changing new energy storage policies announced this March. These regulations aren't ...

For 2025, the compensation standard for standalone new-type energy storage is set at RMB 0.35/kWh. Projects that fail to begin construction by June 30, 2025, will not be eligible for the ...

Projects that meet policy requirements can receive rewards for three consecutive years according to the first-year application standard, with an upper limit of 600 kWh per year for the ...

With the NDRC framework as catalyst, China's storage capacity could realistically triple by 2028 - making "solar curtailment" a historical footnote rather than an operational headache.

With Document 136 abolishing mandatory energy storage requirements and Document 394 pushing for comprehensive electricity spot market coverage, this policy combo directly ...

According to the statistics of the database from China Energy Storage Alliance, the cumulative installed capacity of new electric energy storage (including electrochemical energy storage, compressed air, ...
