

Nepal charging station energy storage project bidding

Why is EV charging important in Nepal?

Nepal is rapidly transitioning toward sustainable transportation, with electric vehicles (EVs) playing a pivotal role in reducing greenhouse gas emissions and urban air pollution. A robust EV charging infrastructure is critical to supporting this transition, enabling convenient, reliable access to power for EV users across the country.

How many charging stations are there in Nepal?

In 2023, the NEA inaugurated 51 new charging stations across Nepal's seven provinces, including 26 stations capable of charging buses, trucks, and cars simultaneously (Farsight Nepal, 2023). These stations are equipped to charge up to three vehicles at once and are strategically placed on highways, bus parks, and urban centers.
