

New high-efficiency solar power generation device

Researchers have developed a solar thermoelectric generator that is 15 times more efficient than the most advanced devices currently available. ...

To address this issue, a hybrid device featuring a solar energy storage and cooling layer integrated with a silicon-based PV cell has been developed.

A combination of AI, smart materials, adaptive solar cells, and blockchain power distribution provides a new solution towards weather ...

Researchers engineered a solar thermoelectric generator 15 times more efficient than current state-of-the-art devices. A Rochester team engineered a new type ...

New high-efficiency solar power generation device
