How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO₄ battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO₄ power stations will last for more than 3,000 charge cycles, or about 10 years.

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.

Can a Bluetti power station withstand water?

The Bluetti Elite 200, for example, has an IP65 rating, which means it can withstand water sprays from all angles. However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors.

How do I choose a portable power station?

A portable power station's maximum output tells you the total watts it can produce, which determines what you can and can't power with it. Look for a power station that can handle the combined wattage of the electronics you plan to plug into it.
