

Pei Photovoltaic Panel Company Address

Do solar panels work in PEI?

While the net metering program in PEI works well, pairing your solar panels with a home battery gives you even more control. You can store your own excess energy to use during a power outage, providing true energy independence. As battery prices come down, expect to see this become a very popular addition to solar installations.

Can I use solar energy credits in PEI?

You can use these credits to cover your electric bill at night or during the winter when your system isn't producing as much. It essentially turns the grid into a giant battery for you, providing financial stability to your energy costs. What is the return on investment for solar panels in PEI?

How much energy does a solar system produce in PEI?

An average 8 kW solar system in PEI will produce around 9,600 kWh of clean electricity per year. This is equivalent to preventing over 6 metric tons of CO₂ from entering the atmosphere annually. Over the 25-year life of the system, that's a reduction of over 150 metric tons of CO₂. The solar industry is constantly innovating.

Where can you see solar panels?

Across the Island, you can see solar panels on homes, farms and businesses. Major projects like the Sunbank solar farm in Summerside are now online, adding significant clean energy to the grid. This push is supported by government programs designed to get more people installing solar.
