

Remarks The test results shown in this test report are exclusively referred to the tested samples. The results refer to the sample as received.

This report summarizes some of the test methods that are in the midst of being adopted as standards and some that are being prepared for submission into the standards process.

Laboratory testing provides crucial baseline data, but real-world performance validation offers invaluable insights into solar panel durability. A comprehensive study conducted across 50 ...

Every year, the PV Module Reliability Scorecard from Kiwa PVEL highlights the latest performance and reliability trends from our independent testing of solar photovoltaic (PV) modules.

State-of-the-art testing to precisely determine photovoltaic (PV) module performance.

This annual report from PV Evolution Labs (PVEL) provides critical insights into the durability, efficiency, and resilience of photovoltaic (PV) modules through rigorous stress tests.

The report highlights manufacturers that meet high standards in long-term durability and energy yield.

Documentation of the energy yield of a large photovoltaic (PV) system over a substantial period can be useful to measure a performance guarantee, as an assessment of the health of the system, for ...

We study long-term performance, reliability, and failures of PV components and systems, both at NLR and through collaborations elsewhere.

The 11th edition of Kiwa PVEL's PV Module Reliability Scorecard is here, featuring all the latest insights in solar reliability and the new list of Top Performers.
