

Photovoltaic panel installation in rice fields

Maintaining high crop productivity in rice fields hosting solar panels remains a major concern for agrivoltaic projects, as demonstrated by a recent ...

A recent study led by researchers from the University of Tokyo explores a promising solution: integrating solar panels with traditional rice farming in a practice known as agrivoltaics.

At the heart of this study is the implementation of a sophisticated dual-axis sun-tracking photovoltaic (PV) system delicately installed above a rice paddy in Miyada-mura, Nagano Prefecture.
