What are the solar PV installation guidelines?

It should be noted that Solar PV installers are advised to use the Solar PV Installation Guidelines in conjunction with all relevant national electrical codes, building codes and regulations. Furthermore, metering and exporting of solar-generated electricity must be done in compliance with the actual legal requirements.

Where can I find a comprehensive overview of photovoltaic systems?

In order to gain a more comprehensive overview of all kinds of PV installations, we recommend to study the DGS Manual Planning and Installing Photovoltaic Systems - A Guide for Installers, Architects and Engineers (as published by the German Solar Energy Society, DGS).

Do I need to meter a photovoltaic system?

It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mounting system, the most common in the industry today, will be installed by the homeowner. While metering the system is encouraged, the specification does not address system wiring elements for associated system sensors or monitoring equipment.

What measurements must be performed before a PV system is connected?

For the PV system itself, some measurements must be performed before the PV array is connected to the inverter. According to the international standard IEC 62446, for each string the measurements of V_{oc} and I_{sc} and a polarity and isolation check are mandatory.

The South African Photovoltaic Industry Association (SAPVIA) has developed a quality mechanism, the PV GreenCard, to ensure that Rooftop Solar PV installations are done responsibly ...
