

Portable outdoor power supply charging in the company

How do you charge a portable power station?

Portable power stations are usually charged via the mains- it's quick and efficient, especially for higher-capacity units. Many also let you charge the device from the car using a 12V cigarette lighter socket - ideal for those living the van life or in the RV. You can recharge some devices using solar panels, too.

How do I choose a portable power station?

A portable power station's maximum output tells you the total watts it can produce, which determines what you can and can't power with it. Look for a power station that can handle the combined wattage of the electronics you plan to plug into it.

Can a portable power station be recharged using solar panels?

Portable power stations come in a broad range of sizes, from smaller models capable of charging a few devices to high-capacity backup units to keep your lighting and critical appliances on during a days-long blackout. And, many can be recharged using solar panels.

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.
