

Price of home solar container battery pack

How much does a solar battery cost?

If you just want to back up a few critical loads, your solar battery cost will be lower. But if you're looking to back up your whole home or go off-grid, expect to pay a lot for battery storage --we're talking about \$25,000 to \$40,000, on average. Compared to solar panel systems, batteries are less customizable in terms of size.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. *The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit--which expires for batteries installed after December 31, 2025--for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

Should you retrofit a battery to an existing solar panel system?

If you retrofit a battery to an existing solar panel system, you'll pay extra for labor, wiring, and in some cases, equipment. Incentives can be the difference between batteries being a smart investment and an expensive luxury.
