

Pure leasing of solar photovoltaic panels

What is solar leasing?

Solar leasing is a financing option through which customers pay a monthly fee for the panels and get to use the power the system produces. They do not, however, own the panels.

How much does a solar panel lease cost?

Solar panel leases cost between \$50 and \$250 per month, on average. The exact amount the homeowner pays depends on the amount of energy they use at home, the company supplying the lease, their location, and their credit score. The customer can choose between a number of financing options that best suit their needs.

Should I lease or buy solar panels?

In either form of solar PPA, you pay for the amount of solar electricity your home consumes rather than a fixed monthly lease payment. Solar PPA rates are typically locked in at prices lower than average utility bill electricity costs. You should weigh the pros and cons of leasing solar panels for your own circumstances.

Are solar panels a lease or a PPA?

Maintenance: If you choose a solar lease or PPA, the leasing company owns the solar panel system and typically offers a service program to cover any maintenance issues that arise during the lease term. On the other hand, if you take out a solar loan to purchase your system, you'll be responsible for its maintenance.

Under a solar lease, a third-party owner (typically a solar company) installs solar panels on your property and then sells you the electricity produced at a predetermined monthly rate.
