

Renewable electricity mauritius

Will Mauritius get a second battery energy storage system?

A significant portion of this funding--Rs 1.4 billion--is earmarked for a second Battery Energy Storage System(BESS) designed to stabilize the electricity grid as Mauritius increasingly relies on renewable sources like solar and wind energy.

How will a private solar project impact Mauritius?

To encourage greater private sector involvement, Rs 1.5 billion has been set aside for purchasing electricity from private solar energy producers. This initiative is expected to shape future programs like the CEB solar scheme 2025 in Mauritius, bolstering the contribution of renewable energy to the national grid.

What is Mauritius Doing in 2025?

The Mauritius government's 2025 budget reinforces its deep commitment to renewable energy and energy efficiency. Through substantial investments in new projects and initiatives, Mauritius is on a promising path toward achieving its renewable energy targets and reducing its carbon footprint.

Why should Mauritius invest in renewables?

Moreover, these initiatives help reduce greenhouse gas emissions, aligning with global efforts to combat climate change. As a small island nation, Mauritius is particularly vulnerable to climate impacts like rising sea levels and extreme weather events. By investing in renewables, the country is proactively mitigating these risks.
