

Retail investors in the photovoltaic energy storage sector declined

How has the residential solar market changed in 2024?

Declines in residential solar markets have been a hit to the industry--but its foundation is strong. Worldwide, 2024 was a difficult year for the residential solar market. After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined.

Is the residential solar market down?

The residential solar market is down, not out. Our analysis indicates that the market is likely to revert to more stable long-term growth over the next several years on the back of strong fundamentals. Almost certainly, surprises will pop up along the way; the industry is not called the solar coaster for nothing.

What is the solar & storage marketplace report?

See all posts by Derek Markham The 20th edition of EnergySage's Solar & Storage Marketplace Report offers a comprehensive look at the residential solar and storage sector in the US during a turbulent 2024.

What is a photovoltaic market outlook?

This photovoltaic market outlook serves as a reference for stakeholders within the industry, investors, policymakers, and economic analysts, providing a snapshot of the industry's health to map its trajectory for innovation and growth in the coming years. What data is used in this Photovoltaic Market Outlook?
