

The blossoming of this internationalism is mirrored in the glass industry of the Roman Empire. Rome asserted its control over the two dominant glass-making centers of the late first millennium (Syro ...

Among the many interesting topics that Perlin surveys in the book, one section that caught my attention concerns the ancient Romans' use of solar heating in the monumental bath ...

Transparent glass, the Romans discovered, acts as a solar heat trap, admitting sunlight into the desired space and holding in the heat so it accumulates inside.

From the shimmering glass of Ancient Rome to the solar cells that power our modern world -- this is the hidden story of light. Discover how human curiosity transformed glass into one of the...

In this paper I refute this claim, drawing on modern ideas about solar energy, heat transfer, human comfort, and the effect of glazed windows to analyze one room in the Forum Baths at Ostia. This ...

That's the promise of Original Roman photovoltaic glass - a dual-purpose material combining ancient Roman-inspired aesthetics with cutting-edge solar technology.

The Romans excelled in glassmaking, developing both innovative techniques and producing a wide array of glass objects for everyday use, decoration, and trade. Here's a concise ...

Roman glass objects have been recovered across the Roman Empire in domestic, industrial and funerary contexts. Glass was used primarily for the production of vessels, although mosaic tiles and ...

Detailed look at Roman glass history, from Hellenistic roots to blown glass, chemistry, trade routes, decoration methods, & its impact across the Roman Empire.

Roman solar Glass
