Who is goodwe solar inverter?

Learn More GoodWe is a leading solar inverter manufacturer specializing in residential and commercial solar inverters ranging from 0.7kW to 250kW.

What is DC to AC solar power inverter?

Off grid solar power inverter can be used in wide DC input voltage range to 220V/380V/480V AC using in solar power system. DC to AC solar power inverter is 50000 watt high power, it suitable for larger off-grid installations such as commercial properties, remote industrial facilities, or large homes with significant energy needs.

How long does a solar inverter last?

No battery storage system, pure sine wave AC output, wide input voltage can be set according to customers' requirement. Powerful protection functions make its service life up to 15-20 years or more. These solar inverters provide a reliable source of power in areas without access to the grid or as a backup power supply.

What is the cooling method of a power inverter?

The cooling method of a power inverter is divided into forced air cooling and natural heat dissipation. The power inverter itself is a heat source. All the heat should be emitted in time and cannot be placed in a closed space, otherwise, the temperature will rise higher and higher.
