

# Schools using South Africa outdoor communication network-connected type cabinets

How many schools in South Africa have Internet connectivity?

According to the NEIM's report of 2021, only 30% of public schools in South Africa utilize Internet connectivity for administrative purposes, 93.53% do not have intercom systems, 45.91% have landlines, and 94.55% have access to cellular networks.

Do South African schools have access to ICT infrastructure?

However, many South African public schools lack access to ICT infrastructure, resulting in significant implications for education quality. While efforts have been made by the Department of Basic Education and research communities, a systematic approach that considers the full technology spectrum for these schools is still missing.

How many schools are connected to SA connect?

Due to its scale and complexity, and budget cuts, only a reduced Phase 1 programme was implemented with a total of 594 public schools connected at the speed of 10Mbps. On 28 January 2022, Cabinet approved the implementation of Phase 2 of the SA Connect, which will see 19,036 schools connected to bring connectivity to all schools.

What is the ICT infrastructure blueprint for South African public schools?

The ICT infrastructure blueprint for South African public schools includes PoE (Power over Ethernet) devices, which allow for flexible power source alternation and minimize network downtime, Fig. 3. Examples of PoE devices include IP cameras, PoE LED lighting, VoIP phones, and Wi-Fi access points.
