

Seychelles energy transition

What is the Seychelles energy plan?

It targets an ambitious transformation and diversification of the Seychelles' currently 85 MW diesel-dominated electricity generation capacity (on Mahé, Praslin and La Digue), aiming at replacing diesel generators with domestic and international public and private financing.

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

What is a people-centred energy transition in Seychelles?

An exciting people-centred energy transition is underway in Seychelles, an archipelago of 115 islands off East Africa in the Indian Ocean. Spearheaded by the Seychelles Energy Commission, the PV democratisation 2.0 project is the recipient of the Climate Investment Platform's Thomas Jensen Energy Transition Award.

How will Seychelles meet the 2030 Agenda?

The Government of Seychelles will identify large rooftops suitable for PV installation. Consumers can then buy a share of the system and pay it back by monthly installments through electricity bills or other mechanisms. Meeting the ambitious 2030 agenda requires a paradigm shift from the traditional way of doing things.

Explore the Seychelles' renewable energy strategy, focusing on solar, wind, and blue economy policies, alongside its role in critical minerals like silica sand and granite, driving ...

Drawing on my experience as an entrepreneur and investor, this article explores Seychelles' roadmap for transitioning to clean energy, highlighting opportunities, challenges, and ...

Seychelles Energy Policy for 2010-2030 recommends a sustainable development of the energy sector focusing on energy efficiency, renewable energy and reducing the dependence on oil ...

Over the next seven years, the program will support Seychelles' energy transition by scaling up renewable energy, reducing carbon intensity, and unlocking private sector investment ...

The Seychelles has long faced challenges in its journey towards renewable energy, primarily due to limited land availability, suboptimal wind resources, and its reliance on Heavy Fuel ...

With this in mind, the Government of Seychelles is accelerating progress towards energy transition through Seychelles' 100% Renewable Energy Strategy (SeyRES 100), which furthers the ...

The third phase of the project will extend the clean energy transition to the outer islands of the Seychelles. The plan is to install 1 MW of solar PV capacity, coupled with a robust battery ...
