

What is the IEA photovoltaic power systems programme (PVPS)?

The IEA Photovoltaic Power Systems Programme (PVPS) is one of the collaborative R&D Agreements established within the IEA and, since its establishment in 1993, the PVPS participants have been conducting a variety of joint projects in the application of photovoltaic conversion of solar energy into electricity.

What does SolarPower Europe do?

SolarPower Europe is responsible for communications, while supporting market analysis and policy activities, in this three-year Horizon Europe funded project, which will aim to: offer sustainable solutions for handling end-of-life solar PV panels in the EU; and optimise solar PV recycling techniques. Questions? Get in touch

Will China & Portugal collaborate on solar energy?

Pedro Amaral Jorge, president of the Portuguese Renewable Energy Association, highlighted the growing cooperation between China and Portugal in the solar energy sector, as Portugal aims to install approximately 8 gigawatts (GW) of solar power by 2026 or 2027 and reach 22 GW by 2030.

What is the IEA PVPS TCP?

Task 1 has released a Fact Sheet on Trends in Photovoltaic Applications 2025. The IEA PVPS TCP regularly publishes assorted reports, articles, and recommended practices based on the research activities of the various tasks. Find here the latest publications that help to improve development and deployment within the solar energy sector.

The Emirates Water and Electricity Company has officially started the main construction phase of the Al Ajban Solar Photovoltaic project with the installation of the first solar panel at the site. ...

On January 28, the first group of panels in the photovoltaic base along Xiaojinchuan River in Aba Tibetan and Qiang Autonomous Prefecture, in Southwest China's Sichuan Province, were ...

Today, solar panels scattered across Africa's vast and sun-drenched lands capture sunlight and convert it into electricity—helping drive the continent's green energy transition while profoundly transforming ...

The project involves the installation of 5,400 solar panels on the building's 10,000-square-meter steel roof. Under the Belgian regulations on the preservation of cultural heritage, the look and ...

Designated by the French government as a "Project of National Interest" receiving priority support, this initiative holds significant strategic importance for strengthening Sino-European green ...

China not only exports solar panels to Africa, but also plays an important role in constructing photovoltaic (PV) power stations and training local talent.

Solar Photovoltaic Panel Project Cooperation

Dau Tieng Photovoltaic Solar Power Project (500 MW) in Vietnam is the biggest solar project in Southeast Asia and the world's largest semi-immersed photovoltaic project.

Both companies will work closely to identify and deliver impactful solar PV projects that prioritize sustainability and long-term regional benefits. About JA Solar Founded in 2005, JA Solar is ...

SolarPower Europe is responsible for communications, while supporting market analysis and policy activities, in this three-year Horizon Europe funded project, which will aim to: offer sustainable ...
