

Solar energy storage buys new lithium batteries

The collaboration covers the supply of ONE's battery modules containing U.S.-manufactured lithium iron phosphate (LFP) cells for GE Vernova's Solar & Storage Solutions ...

South Korea's Samsung SDI said on Wednesday that its unit Samsung SDI America has signed a deal to supply lithium iron phosphate (LFP) batteries to a U.S. customer for energy storage...

German inverter and battery manufacturer SMA Solar Technology AG has unveiled a modular lithium iron phosphate battery system for commercial and industrial applications, with ...

From lithium-sulfur materials to scrapped factory expansions, this roundup covers the latest in energy storage.

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping industries from transportation to utilities.

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

Summary: As renewable energy adoption accelerates, photovoltaic (PV) storage companies are increasingly acquiring lithium batteries to meet rising demand. This article explores the industry's ...

Powerwall is a compact home energy battery that can store solar electricity for self-consumption alongside time of use load shifting and backup power. Like Tesla, EV manufacturer ...

GE Vernova has signed a term sheet for the supply of lithium iron phosphate (LFP) battery modules from US startup Our Next Energy (ONE).

Discover 10 new battery storage companies to watch in 2026 & find out how their solutions will impact your business!
