

Solar panels for supermarkets

Are supermarkets embracing solar power?

direct relationship with ever more environmentally conscious customers; electricity consumption likely to rise with EV charging...Many big supermarket chains are embracing solar power: Tesco aims to generate 10% of its energy demand on site by 2030, and Aldi has rolled out solar panels across over 240 of its UK stores.

Does a supermarket need solar?

While solar is great for supplying the store's electricity demand, it's also worthwhile investing in the most efficient appliances to reduce that demand. Spirit can help on the lighting front, replacing all your lights with LED equivalents at no upfront cost - find out if you're eligible. Why is solar right for supermarkets?

Will supermarkets benefit from the Solar Revolution?

Supermarkets have many attributes that make them prime candidates to benefit from the solar revolution: high energy demands throughout the day - bills that can be slashed by solar; direct relationship with ever more environmentally conscious customers; electricity consumption likely to rise with EV charging...

Should supermarkets use solar EV chargers?

Catering for this demand, the number of EV chargepoints at supermarkets has doubled in the last 2 years - now 6.5% of public chargers are at supermarkets. Solar PV - perhaps even in the form of large scale solar carports - can be a cost-effective way to meet this extra electricity demand.

At Go Green Solar Group, we work with various retail companies to provide solar panels for supermarkets. With the rising impact of energy costs and environmental impact, supermarkets play ...
