

Solar power generation prices in North America

Total installed costs for renewable power decreased by more than 10% for all technologies between 2023 and 2024, except for offshore wind, where they remained relatively stable, and bioenergy, ...

The North America Solar Photovoltaic (PV) Market Report is Segmented by Grid Type (On-Grid and Off-Grid), End-User (Utility-Scale, ...

The North America solar PV market was valued at USD 45.4 billion in 2025 and is projected to grow at a CAGR of 6.3% from 2026 to 2035, driven by rising decentralized and off-grid solar installations.

US Solar Market Insight is a quarterly publication of Wood Mackenzie and the Solar Energy Industries Association (SEIA).

In 2024, 17 countries, with variable renewable energy (VRE) generation exceeding 25%, introduced intended solutions to mitigate issues related to high curtailment, negative pricing, VRE unprofitability, ...

The average price of a solar PPA signed in North America increased 4% between the second and third quarters of 2025, according to LevelTen.

Learn about the cheapest sources of electricity in 2024 in America. From wind to solar to fossil fuels, NPUC breaks down how expensive each is.

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.

Key market insights highlight a substantial and growing preference for ground-mounted solar PV systems, particularly in utility-scale projects, owing to their higher energy yields and greater ...

In Q3 2025, LevelTen Energy's Market-Averaged Continental Index saw P25 solar PPA prices increase by 4% quarter over quarter. These rising ...
