

Fourteen large battery storage systems (BESS) have come online in Sweden, deploying 211 MW/211 MWh for the region. Developer and optimiser Ingrid Cap...

Our BESS is now in operation ?? Our battery energy storage project in Sweden is now fully operational and delivering services to the Swedish grid - an important milestone ...

Sweden installed 430 MW of solar in the first half of 2025, with industry group Svensk Solenergi noting slower growth than last year but rising ...

The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 ...

Dive into the Top 20 energy storage projects shaping Sweden's next big energy shift.

The Swedish government has introduced the Kraftlyftet proposal, aimed at increasing power availability in the electricity system - including through batteries connected to PV systems.

From electrofuels and modular battery systems to thermal solutions - here, knowledge and demonstrations are created that enable Sweden's energy transition when storage becomes the key ...

From the signing of the land lease agreement at the end of 2022 to the construction now underway, the project illustrates the rapid development within energy storage and how advanced ...

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have ...

Swedish solar energy storage project
