

Syria Solar Panel solar Project

Is putting solar panels on roofs a solution in Syria?

"The solution to the problem isn't putting solar panels on roofs," Syria's interim Energy Minister Mohammad al-Bashir told The Associated Press. "It's securing enough power for the families through our networks in Syria. This is what we're trying to do." Some of the efforts focus on simply repairing infrastructure destroyed in the war.

What is Syria's Energy Plan?

The plan will look at Syria's projected energy demand and determine how much of it can come from renewable sources.

What role does energy play in Syria's Recovery?

"Given the critical role of energy in Syria's recovery, we have to rapidly address energy poverty and progressively accelerate the access to renewable energy," Sudipto Mukerjee, UNDP's resident representative in Syria, said in a statement announcing the plan.

How many megawatts does Syria need?

Al-Bashir said Syria's infrastructure that has been repaired can provide 5,000 megawatts, about half the country's needs, but fuel and gas shortages have hampered generation. With the sanctions lifted, that supply could come in soon.

Damascus launches a fixed-tariff scheme for 2-10 MW green power and signs a deal with 20Solar Energy to build twin 100-MW solar plants, one with battery storage. Syria has taken its most ...
