

The best inverter for off-grid solar

Do you need an off-grid inverter in 2025?

If you're going off the grid in 2025, you're going to need a reliable inverter to make it all work. Off-grid inverters are the heart of a solar energy system, converting DC power from solar panels or batteries into usable AC power for your home or business.

How do I Choose an off-grid inverter?

When selecting an off-grid inverter, it's important to consider whether it can directly integrate with your solar panel system. Some solar inverters come with a built-in MPPT (Maximum Power Point Tracking) solar charge controller, which optimizes the energy harvested from your solar panels and eliminates the need for a separate controller.

What is the most powerful off-grid inverter?

The SA-12K is the most powerful off-grid inverter developed by SolArk. With 9kW, it has no problem to power a fully off-grid house. It features 2 MPPT solar charge controllers that allow up to 13kW of solar panels. This is more than enough to cover the daily needs of the average American house.

Which solar inverter is best?

Why we like it: Sol-Ark's hybrid inverter is a favorite among solar pros. It supports seamless switching between solar, battery, and grid power--and even works with generators. Plus, it's one of the most advanced hybrid inverters on the market. Why we like it: Bluetti's newest flagship system is a game-changer for portable and modular energy.
