

Can electric vehicles decarbonise road transport?

Electric vehicles are the key technology to decarbonise road transport, a sector that accounts for around one-sixth of global emissions. Ambitious policies continue to be critical to growth in electric vehicle markets worldwide. Where do we need to go?

How much energy will EVs use in 2023?

The global EV fleet consumed about 130 TWh of electricity in 2023, which accounted for about 0.5% of current total final electricity consumption worldwide. The use of EVs displaced around 0.9 Mb/d (2 EJ) of oil in 2023. EVs would need to displace around 8.2 Mb/d (18 EJ) of oil in 2030 to be in step with the NZE Scenario. IEA. Licence: CC BY 4.0

How many EV chargers are there in Europe?

The number of public and private EV chargers in the country went from 10 to 20 million in 18 months. The Model Y was Tesla's best-seller in Europe, but it wasn't enough to fend off Volkswagen on the constructors' list.
