Can you build a solar panel using store-bought solar cells?

Building a small, DIY solar cell is a great way to improve your understanding of how solar technology works. However, if you want a functional solar panel, your best option is to create one using store-bought solar cells. Purchase wired micro polycrystalline solar cells for the easiest option.

How do solar panels work?

Solar panels use silicone or coated glass cells to capture sunlight and generate electricity. If you want to make a basic solar cell, all you'll need is a few household items, titanium dioxide, and conductive glass. In just a few hours, you can create a small, basic solar cell that generates a modest current!
