

# What to do if the back of the photovoltaic panel is cracked

Do cracked solar panels work?

Cracked panels work if we define a working panel as one that produces a current. At least most of the time, cracks don't damage the solar cells themselves. These cells are among a solar panel array's most critical components. Even if a solar cell has been damaged, that doesn't compromise the entire panel.

How do you fix a cracked solar panel?

1. Using the glass cutter, carefully cut out the cracked portion of the solar panel.
2. Cut a piece of plywood to fit over the opening created by the removal of the cracked portion of the solar panel.
3. Apply epoxy resin to the back of the plywood and place it over the opening.
4. Allow the epoxy resin to dry for 24 hours.
- 5.

Can a cracked solar panel be reattached?

Most of the time if a solar panel is cracked, restoring it becomes impossible, and the broken parts can't be reattached. However, some people have found a way to restore them using see-through laminating film, polyurethane, or resin to cover the cracked glass and safeguard the solar cells.

Can a damaged solar panel be repaired?
